
PROJECT TOPIC: HOMEMADE FOOD DELIVERY MANAGEMENT SYSTEM

Programme: MCA

Project Group Members:

1. Jatin Lavania (C-20/ 2484200084.)
2. Aman Kushwaha (C-04/ 2484200019)
3. Laxman (C-33/ 2484200106)
4. Bhartendra Chaudhary (C-09/ 2484200042)
5. Manu Bhardwaj (C- 29/ 2484200114)

Project Supervisor: Mr.Nitesh Bhardwaj, Assistant Professor

Objective: The main objective of the Project on Online Homemade Food Delivery Website is to manage the details of Food item, Category, Cart, Order, Customer. It manages all the information about Food item, Delivery, Customer, Food item. The project is totally built at user, Homemade and administrator end and thus only the administrator is guaranteed the access. The purpose of the project is to build an application program to reduce the manual work for managing the Food item, Category, Delivery, Cart. It tracks all the details about the Cart, Order, Customer.

Tools required:

➤ **Hardware Requirements:**

- Processor: Intel i3 or higher
- RAM: Minimum 4 GB
- Storage: At least 10 GB free disk space
- Display: Minimum 1366×768 resolution

➤ **Software Requirements:**

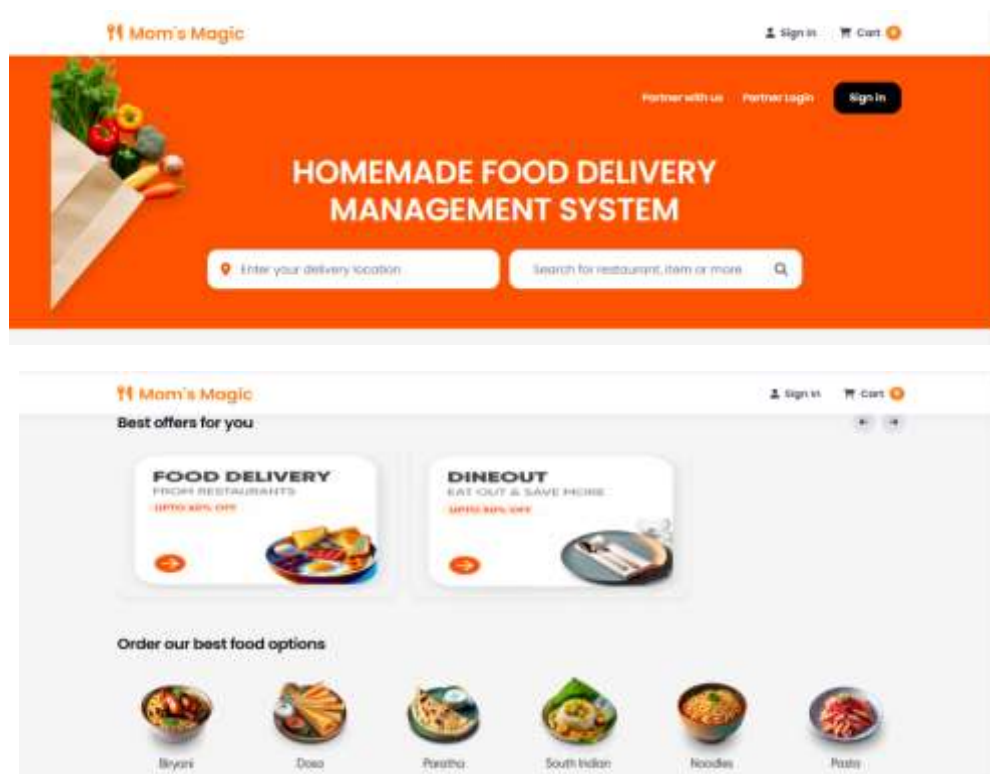

- Operating System: Windows 10/11, Linux, or macOS
- Frontend : HTML/CSS/JAVA SCRIPT /AJAX
- Backend : PHP, MYSQL
- IDE: VS Code

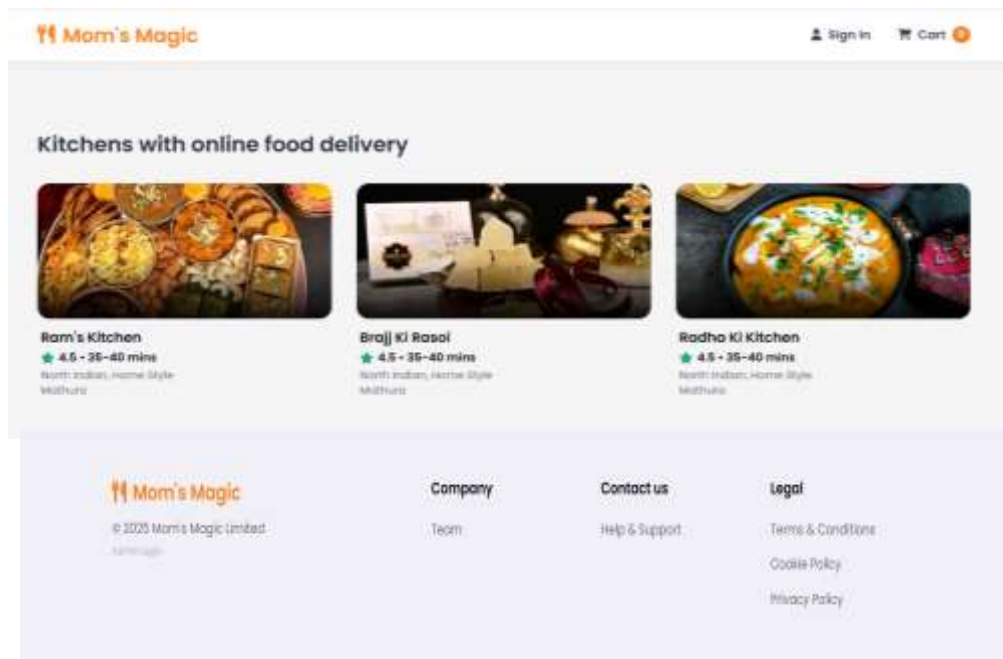

Abstract: The rapid growth of the online food delivery industry has largely focused on commercial restaurants, often overlooking the growing consumer demand for authentic, healthy, and hygienic homemade food. To bridge this gap, this project introduces "Mom's Magic," a comprehensive Homemade Food Delivery Management System. The platform serves as a digital bridge connecting talented local home chefs with consumers seeking fresh, home-cooked meals. Developed using web technologies including PHP, MySQL, JavaScript, and AJAX, the system features a robust multi-role architecture comprising Admin, Kitchen Partner, and Customer modules.

Key functionalities include location-based kitchen discovery, an intuitive cart and checkout process integrated with a simulated secure payment gateway (including a virtual 'Magic Wallet'), and an interactive real-time order tracking system utilizing Leaflet.js mapping. Furthermore, the system incorporates a unique "Custom Food Request" (Hybrid Model) feature, allowing customers to communicate specific dietary preferences directly to the chefs. By providing a modern, responsive, and industry-standard user interface, "Mom's Magic" not only delivers a seamless ordering experience for users but also empowers home-based culinary entrepreneurs with a scalable digital storefront to manage their menus, track revenue, and grow their local business.
